

# 按钮 Button

支持多种不同的元素

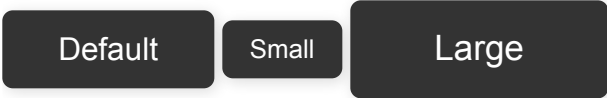

```
a:
<a href="#" class="btn">Button</a>

button:
<button type="button" class="btn">Button</button>
<button type="submit" class="btn">Submit</button>
<button type="reset" class="btn">Reset</button>

input:
<input type="submit" value="Submit" class="btn">
<input type="reset" value="Reset" class="btn">
```

## 尺寸

添加 `class="xs"` 转换为小按钮，添加 `class="xl"` 转换为大按钮

```
<button type="button" class="btn">Default</button>
<button type="button" class="btn xs">Small</button>
<button type="button" class="btn xl">Large</button>
```

## 状态

可添加图标（input元素的按钮不支持添加图标），添加 `class="disabled"` 转换为禁用按钮，添加 `class="square"` 转换为直角按钮

```
<button type="button" class="btn"><i class="flaticon-user151 mr3"></i>Icon and Text</button>
<button type="button" class="btn"><i class="flaticon-picture28"></i></button>
<button type="button" class="btn disabled">Disabled</button>
<button type="button" class="btn square">Square</button>
```

添加 `class="line"` 转换为块元素

```
<button type="button" class="btn line">Line</button>
```

## 配色

```
<button type="button" class="btn bg-gray">Button</button>
<button type="button" class="btn bg-orange">Button</button>
<button type="button" class="btn bg-lime">Button</button>
```

```
<button type="button" class="btn bg-blue">Button</button>
<button type="button" class="btn bg-pink">Button</button>
<button type="button" class="btn bg-purple">Button</button>
```

## 按钮组 Button Group

添加父级元素 `div`，并为其设置 `class="btn-group"`

```
<div class="btn-group">
  <button type="button" class="btn">Button1</button>
  <button type="button" class="btn">Button2</button>
  <button type="button" class="btn">Button3</button>
</div>
```

## 垂直

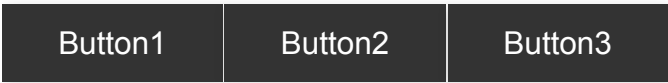

添加 `class="vertical"` 转换为垂直排列

```
<div class="btn-group vertical">
  ...
</div>
```

## 直角

添加 `class="square"` 转换为直角按钮

```
<div class="btn-group square">
  ...
</div>
```

## 分页

```
<div class="btn-group">
  <button type="button" class="btn xs">Prev</button>
  <button type="button" class="btn xs">1</button>
  <button type="button" class="btn xs">2</button>
  <button type="button" class="btn xs">3</button>
  <button type="button" class="btn xs">4</button>
  <button type="button" class="btn xs">5</button>
  <button type="button" class="btn xs">Next</button>
</div>
```
